## DETAILED ACTION

The Amendment filed on 08/08/05 has been received and entered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 3, 10, 11 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Shirai (US Patent No.6,021,082 cited by Applicant).

Shirai discloses an internal voltage generating circuit in a semiconductor memory device, having all the elements as recited in claims 3, 10, 11 and 17 as follows:

a comparing means (117, Fig. 3) for comparing a voltage level of an internal voltage (node 116) with that of a reference voltage;

a pull-up driving means (118, Fig. 3) for performing a pull-up operation for an output terminal in response to an output signal of the comparing means;

a first discharging means (transistors 112 and 113) for discharging the output terminal when the voltage level of the internal voltage is higher than a predetermined target voltage level in response to the internal voltage, wherein the first discharging means includes a plurality of active loads connected between the output terminal and a ground voltage in series (Fig. 3).

***Allowable Subject Matter***

3. Claims 1 and 2 are allowed.
4. Claims 4, 6-9 and 12-16 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to claims 3, 10, 11 and 17 have been considered but are moot in view of the new ground(s) of rejection.
